Grit plates

GriT granule plates

Available in every colour, size and thickness. There is a choice of fire-resistant and large granule plates. They are virtually indestructible. They can be used on bridges, loading platforms, slippery pavements, work platforms and uneven surfaces.

GriT Diamond plates

Strong GriT diamond plates are available in thicknesses greater than 4 mm. They are available in any colour and any grain size.

GriT step covers

Available in every colour, size and thickness. There is choice of fire-resistant and large grain plates. They are virtually indestructible. They can be used on bridges, loading platforms, slippery pavements, work platforms and uneven surfaces.
